Cheviot short-listed for Best Investment Manager at FT Wealth Management Awards

Cheviot Asset Management, one of the UK's fastest growing private wealth management businesses, is pleased to announce that it has been short-listed for the Best Investment Manager Award at the inaugural Investors Chronicle and Financial Times Wealth Management Awards. The winner will be announced on 23 April at the London Marriott Grosvenor Square Hotel.

The event will consist of eight awards that recognise the top wealth managers for individual investors and charities with assets of up to £5m (and above).

The Best Investment Manager Award is one of four awards based on the views of readers of the Financial Times and Investors Chronicle. Readers who use a private bank or wealth manager were asked to rate the services and all round performance, which are then judged by editorial staff and a panel of wealth experts.

Michael Kerr-Dineen, Chief Executive, commented:

"We are very proud to have been short-listed for this award following a record year for the business in which we have increased assets under management to £2.5bn. It is especially rewarding to be recognised in this way by our clients and testament to our hard work in providing a first class service to them."
